

Our On The Road App Is Revolutionising How Equine & Farm Vets Work!

Ask us about the Mobile Cloud PMS which works at Yards & Farms Even With No Connection.

With quick and easy access to information regardless of an internet connection, our On The Road app allows you to work offline and synchronise with the main PMS as soon as you reach a connection.

It's easy to manage your day by downloading appointments and location maps, so phone calls & texts need just a quick tap on the screen.

Review previous notes & photos, record new clinical history, upload photos and dispense items now or later. View client invoice balances, change the appointment status so the practice knows how you are doing, book follow-up appointments and raise new invoices.

You can also search for treatments, products & services, add discounts, scan barcodes, export MI reports and use the integration feature with Abaxis Lab Machines and external Labs.

With more features regularly released and free unlimited one to one online training, what are you waiting for?

Choosing VetIT for your PMS delivers ultimate flexibility for your practice. All your account management, calendar, dispensary, pricing, invoicing and reports in one place, accessed securely from your desktop, laptop and mobile devices. We help you to focus on providing the highest standards of patient care and growing your practice.

IMPRESSED?
